Professional Summary

Graduate Master's student in Information Systems with a background in Computer Science and an interest in data, technology, and cloud solutions. Skilled in SQL, Python, Excel, Power BI, and AWS, with experience in data analysis, dashboard development, and working with structured datasets. Curious and motivated to apply analytical and technical skills while learning and contributing in a professional environment.

Education

MSc. Information Systems Management, Sep 2024 – Nov 2025

University of Galway (Grade: 2:1), Galway, Ireland

- **Key Modules:** Advanced Programming for Business Analytics, Strategic Management, Systems Development & Project Management (SCRUM, Agile), AI, Business Modelling, Enterprise Systems.
- **Key Project:** Collaborated on developing an LLM-based financial market forecasting system using news-based sentiment analysis. Applied NLP models such as BERT and RoBERTa along with machine learning models including SVM and LSTM to analyse financial news and improve market prediction accuracy.

B.E. Computer Science and Engineering, Aug 2020 – May 2024

Anna University (Grade: 1:1), Chennai, India

- **Key Module:** Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming, AI & ML
- **Key Project:** Developed a real-time plant disease detection system using transfer learning with the VGG-19 model, achieving 97% accuracy in classifying plant diseases from leaf images.

Employment history

Teaching Assistant - Data Analytics & Python, Jan 2026 – Present

University of Galway, Galway, Ireland

- Tutored lab and classroom sessions for 200+ Master's students, supporting Python-based data analysis using Pandas and NumPy.
- Guided students through data processing workflows and machine learning concepts using practical exercises.
- Provided academic support, debugging assistance, and assessment guidance to strengthen understanding of analytics fundamentals.

AI ENGINEER Intern, Aug 2025 – Dec 2025

Brill soft private limited, Chennai, India

- Developed automated data extraction pipelines to collect candidate profiles, resumes, and portfolio information from multiple sources, reducing manual data collection work by around 70%.
- Cleaned and transformed candidate and operational datasets using Pandas, PySpark, and Excel Power Query, ensuring high data quality and consistency for downstream processing.
- Converted unstructured resume data into structured formats (CSV, JSON) using Pandas to enable efficient storage and querying.
- Built KPI dashboards to track recruitment metrics such as candidate volume, skill distribution, and processing timelines.

Store Manager / Retail Assistant , Nov 2024 – Present

Mobile Tech (Part-Time), Galway, Ireland

- Successfully balanced part-time employment with academic commitments while maintaining strong performance in both.
- Promoted to Store Manager within six months due to exceptional sales performance and leadership in a fast-paced retail environment.
- Led and supervised a team of 5 employees, ensuring smooth daily operations and strong customer service.

Skills Profile

Leadership: Served as General Manager at the Entrepreneurship Development Cell, leading a team of 40 members and supporting startup initiatives. Co-Founder of Fullydoped, an NFT platform.

Teamwork & Community Engagement: Volunteer with Galway Autism Partnership (GAP) Ireland and Sergeant-at-Arms at the Rotaract Club, supporting community initiatives and team collaboration.

Communication & Stakeholder Management: Developed strong customer engagement skills through experience as a Sales Assistant, managing customer interactions and sales relationships

Technical Skills

- **Data Analysis:** SQL, Excel, Power BI, Power Query, Data Cleaning, Exploratory Data Analysis (EDA)
- **Programming & Machine Learning:** Python (Pandas, NumPy), PySpark, Scikit-learn, TensorFlow, ETL
- **Cloud & Data Tools:** AWS (S3, Athena, Glue, QuickSight, IAM, EC2), Web Scraping , Docker
- **Development Tools & Technologies:** HTML, CSS, Bootstrap, GitHub, VSCode, Microsoft Office 365

Live Client Project

Sales Analytics System for my Part-Time Retail Shop

Tech Stack : AWS (S3, Glue, Athena), Python, ODBC, Power BI

- Built a cloud-based data pipeline on **AWS** to centralise sales transaction data collected from multiple retail branches, storing raw datasets in Amazon S3 to create a scalable and centralised data lake.
- Used AWS Glue to clean, transform, and catalog raw sales data, converting it into structured and analysis-ready datasets while ensuring data consistency and quality.
- Queried processed datasets using Amazon Athena and established an ODBC connection with Power BI, enabling efficient retrieval of large-scale sales data for analytical reporting.
- Developed interactive Power BI dashboards visualising **key business metrics** such as top-selling products, weekend sales trends, and inventory performance, helping managers make data-driven decisions and reducing manual reporting time by **60%**
